Literature about family business is growing extremely fast. There is, however, still much to do in order to better understand governance in family businesses and to relate different structures and processes of governance to key outcomes, such as growth, strategy, internationalization and continuity. Since research on governance in family businesses has great potential to contribute to the wider field of corporate governance, we aim to create a forum where researchers can explore the many ways research on family business governance can inform and extend the general knowledge on corporate governance.
